SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:43:47 AM

The feed in tariff should be on par with what the retailers charge us per kilowatt and increase with their increases which they so often do. This would be a fairer system than what we have now, which is a pittance of what we deserve. Our electricity is pollution free which help the environment and should be of higher value than the product they sell which is mainly coal powered generated electricity.
