**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
10:41:03 AM

Herewith my support for a fair price to be paid for the power my roof panels feed into the energy company grids.

Further, the feed-in tariff should increase in line with the wholesale price of electricity and should not just be a benchmark range, The tariff should be regulated so that retailers have to offer it as a minimum. The feed-in tariff should represent the true value of solar, recognizing the environmental and health benefits and the network benefits of rooftop solar. I installed my rooftop panels precisely on those grounds as encouraged by government and environmentalists.
