

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:53:11 PM

I fail to see why I should be giving power that my solar cells have generated to the electricity providers for nearly nothing. When I first started supplying power to the grid I was receiving \$0.195250 cents per kilowatt hour that I feed into the system which I felt was a fair return, whilst the suggested offer is not up near that mark at least it is getting close to it.

I would ask IPART to:-

1/ Support a fair price for solar.

2/ Feed-in tariff should increase in line with the wholesale price of electricity.

3/ Feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

4/ Feed-in tariff should represent the true value of solar.

Regards
