Submission: "The Independent Pricing and Regulatory Tribunal (IPART) are looking at cutting the NSW solar feed-in tariff benchmark to 8-9c per kWh.

They're justifying this drop because rooftop solar has reduced the wholesale price of power for everyone. This is even more of a reason to pay solar owners a fair price, not punish people who've done the right thing.

I support a fair price for solar, it's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users.

Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar."
