Submission: "Dear Sir/Madam,

I support a fair price for solar.

It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users.

Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

We should be paid 1:1 with the retailers as we are significantly reducing Peak demand, and stress on the grid during the hot summer days. The majority of residential with PV is within a commercial hub and therefore the energy generated can be use locally.

Stop lining the pockets of your buddies in the retail industry and focus on the future of distributed power.

Regards

Alistair"
