SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
8:20:21 PM

To Whom It May Concern,

A FAIR GO FOR AUSTRALIANS WITH SOLAR

I would like to submit the following points:

- I support a fair price for solar;
- The feed-in tariff should increase in line with the wholesale price of electricity;
- The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
- The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

Those people who choose to help themselves and the environment by installing solar (at some expense) should be rewarded for their efforts and sacrifice. Visionary thinking is necessary in all walks of life at this time as our Earth is undergoing great stress and change. We haven't taken care of our planet and so we have exacerbated the natural climate changes by destroying our oxygen giving oceans (Fukushima, oil spills, etc) and polluting our air. It is high time we make urgent change a priority. Rewarding those who are on the front line makes perfect sense.

Sincerely,

Anne Dalton
