**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

1:25:26 PM

Dear Madam/Sir,

We support a fairer solar feed-in tariff in New South Wales. As early investors in rooftop solar, we have experienced a number of changes, over the years, in the ways we have been treated by the electricity industry, mostly, and currently, unfairly. For example, we are not only paid much less than the wholesale price for the electricity we supply to the grid; and we pay a daily rate for the wires used by the electricity corporation to receive and sell the electricity we supply. We think it would be fairer if we were paid a feed-in tariff much more closely aligned with the wholesale price, that the minimum feed-in tariff be regulated (reducing the ability of the corporation to make 'errors' in the way they process our account - our experienced with the billing corporation is evidenced it cannot be trusted to implement benchmarks fairly to solar power providers).

Thank you,

Anne and Graham Dash
