

Author name: A. Duong

Date of submission: Wednesday, 2 May 2018

Submission: "The solar feed-in tariff needs to be increased, not decreased. Our country needs to move forward and support clean energy. How can politicians, who job is to look after our country, support dirty fuel an penalise citizens who are doing their best to look after our future? Please take care of our country for future generations.

Yours Sincerely,

Anna Duong"
