

Author name: A. Fay

Date of submission: Friday, 27 April 2018

Submission: This is another example of the government not serving the community for the community rather than serving it for themselves. Families love to swim in these waters and you have no conscience to allow us to basically swim in our own excrement. We completely and utterly disagree with this ruling. The local pr firms and lawyers that work in the area will look forward to seeing your faces in court. We feel so passionately about this we will never let this rest!
