**SOLAR FEED-IN TARIFFS 2017/18**

**Thursday, 11 May 2017**  
9:53:23 PM

I submit that the feed-in tariff for NSW residents should be raised from the present low level to a more reasonable level, such as that proposed by the Independent Pricing and Regulatory Tribunal of 11.6cents per kWh to 14.6cents per kWh. Since electricity providers currently charge many times the current feed-in tariff to their customers, it is not unreasonable to give customers a decent price for their electricity.
