SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

8:24:35 AM

The solar feed in tariff should represent a fair wholesale price for power. The current situation encourages solar producers like me to use as much of the power myself (often wasting it heating water or pumping water or running a swimming pool pump more than required) rather than push it back into the grid where it could benefit the greater community.
