

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

10:24:32 PM

Please take note of the following points in my submission

1 I support a fairer price for solar. It should be on a par with the price that the big electricity producers sell their electricity for.

2, The feed-in tariff must rise in line with wholesale price of electricity like the coal based electricity.

3. The feed-in tariff should represent the true value of solar, namely nil carbon dioxide production and no production of noxious gases.

4. The feed-in tariff should be regulated so that retailers must offer it as a minimum price.
