Submission: "The Independent Pricing and Regulatory Tribunal (IPART) are looking at cutting the NSW solar feed-in tariff benchmark to 8-9c per kWh.

They're justifying this drop because rooftop solar has reduced the wholesale price of power for everyone. This is even more of a reason to pay solar owners a fair price, not punish people who've done the right thing.

I support a fair price for solar. This should represent the contribution that solar households are making to prevent climate change. They shouldn't be disadvantaged."
