

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Thursday, 11 May 2017
11:33:48 AM

A fairer price for solar is an absolute must and really Solar customers deserve to be reimbursed for the power put back into the grid. As a rooftop solar contributor I feel we should be recognised for the contribution we make to lowering greenhouse emissions also.

I am about to increase the number of pannels I have and would dearly love to have a feed in tariff to match my contribution.
