SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:53:27 PM

as a provider of electricity via my solar roof panels I should get a fair price for that power generated. And whenever the wholesale price is changed that should also occur to solar power created by arrays on residential and commercial roofs in NSW. The benefit of solar power must be recognised in price as well as its ability to reduce in NSW and Aust greenhouse gas emissions
