SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:06:51 PM

I support a fair price for solar. The feed-in tariff should increase in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. I have two properties both with solar systems (10kw and 12kw). I export a huge amount of electricity back to the grid and am not fairly compensated for this. If you want more people to adopt solar, then the feed in tariff needs to be fairer.
