Submission: I strongly object to an increase in water prices by HWC.

The organisation sponsors too many politically correct and left wing activities which is a total waste of funds.
The dividend returned to the state should be reduced to pay for capital works.

The state is planning to increase population in the hunter by bringing in refugees to ensure there is growth, which puts more demand on resources.

This is something that has an impact on water storage per capita.

Stop approving developments and allowing immigrants into the Country/state until these issues are resolved.

The cost of living gets higher and harder for large families especially in regional australia where wages are lower and opportunities are minimal compared to Sydney.
