**SOLAR FEED-IN TARIFFS 2017/18**

**Sunday, 21 May 2017**

11:52:33 PM

I support a fair price for solar power;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; compared to the very harmful fine coal dust and other chemicals emitted from coal fired power stations. Solar is free and will only require some maintenance, rather than constantly having to buy electricity powered by coal or gas.
