SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
1:25:41 PM

As retired Mechanical Engineer I strenuously support the doubling of the Feed-in tariff. It should close to the Off-Peak tariff. Doubling the Feed-in to around 14 cents/kWh will more encourage people to install more solar panels. Then when battery prices fall, people will install them to smooth out their peak domestic loads. They will reduce the need for more base load stations and gas turbines to handle peak loads.

So please make the Feed-in tariff attractive for making solar more attractive housing and businesses, to get us ready for local generation and distribution.

Alan Parker
