SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

12:49:49 PM

I support a fair price for solar;

I believe that the feed-in tariff should increase in line with the wholesale price of electricity;

I also believe that the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

It is only fair and ethical that the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar;

Based on the Four Corners report of 8th May 2017, It is obvious that solar energy, especially at the household level, is an affordable and sustainable way towards solving a big part of our energy crisis. The pathetic response from present and past governments is deplorable and those involved in such inaction deserve a public flogging.
