**SOLAR FEED-IN TARIFFS 2017/18**

10:48:09 AM

Origin buys electricity from the wholesaler for 6c per kW and sell it back to us for 27-29c/kW plus \$1 per day access charge. That is price gouging. A fair rebate for our solar would be \$1 access charge per day because they are using our infrastructure plus a reasonable cost per kW such as a median price point of 20c per kW for using our solar electricity. This is ethically acceptable as well as providing a reasonable profit for the electricity retailers as well as a reasonable benefit to the solar provider.
