Submission: "To whom it may concern,

As a frustrated Australian citizen I am writing to ask the government that it is time to set a fair feed-in tariff price for solar owners who are providing clean electricity into the grid and helping reduce the costs for energy retailers. We should be rewarded not punished.

Last year more than half of the retailers in NSW failed to offer a FIT within the benchmark range. The FiT needs to be fairly priced and regulated and mandated so that the retailers have to offer it as a minimum. This feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar in NSW.

Governments main objective is to regulate and monitor big business to stop them gouging consumers and chasing unfair profits over citizens who are helping them generate electricity.

Regards,

Adam Regan."
