SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
4:28:00 PM

After making a considerable invest in solar panel for the production of clean energy as part of my commitment to future generations an disappointed energy companies are profiting from this.

People who generate addition clean energy surplus to there needs need fairy compensated, nit the energy companies.

I support a fair price for solar;
The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar not 5 cents a kilowatt.

Seriously support a fair price for electricity generated by home solar energy installations.

Thank you

Allan Richmond
