SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

9:41:04 PM

Please ensure that the feed-in tariff for Solar energy is doubled as proposed so that those of us who have made considerable sacrifices in order to put solar systems on our rooftops are able to recoup some of our expenses by saving on the overall price of our electricity.

athe feed-in tariff should also increase as the wholesale price of electricity increases - this is obvious and only fair. We are, after all, selling electricity to the grid.

Thank you,

Amica Sanday
