

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

9:19:22 PM

Dear IPART commissioner,

I am writing to you to ask for a fair feed-in tariff for solar energy. Energy suppliers should be required to pay a price that is in proportion to the price they sell electricity for or related to the price they pay other electricity generators.

The benefits of solar generation to the environment and towards a livable future should be recognised in the price. Despite what our current government proclaims, the science is clear, climate change is real and the more attractive it is for people to generate clean energy the sooner we can stop polluting the environment by burning fossil fuels.

Yours Sincerely,

Arthur Sannen
