SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
12:03:27 PM

Household solar does not get tax concessions or GST rebates. The owner has to maintain or replace equipment at the owners expense. Feed In Tariffs should reflect this at the moment they do not. Feed In Tariffs should be .mandatory not voluntary. We are saving the Power Generators from over generating to allow for Line Drop. Tariffs should give the solar owner credits for the whole days solar generation not just for small segments during usage during the day. Households solar should also reflect the Wholesale Powers Generators pricing ups and downs
