SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

I am the owner / occupier of property in an area that has power supplied by Origin Energy.

I installed 5 kW solar panels 4 years ago and have only received a credit of 6¢ a kWh for any excess power generated.

I have always believed that a fairer rate should be paid especially considering that some corporate organizations purchase their electricity at discounted rates.

I have observed the actions of some electricity suppliers, to charge a fee for even the smallest item .

I am not in a position to set a fee for the electricity supplied to the grid, and ask that action be undertaken to mandate a fair, true value for all electricity supplied by private property owners, and that the mandated price paid be adjusted in line with any wholesale or retail price charged by the electricity supplier
