Submission: RE: Hunter Water Corporation - please do not raise prices

Please do not raise the water prices as to do so would financially disadvantage the most vulnerable people in our society. We cannot survive without clean water so don't charge us more for a basic human requirement. Many people in the Newcastle area and a lot of us in the Wallsend area suffer the effects from flooding when there is a lot of rain activity. This is very draining on our health and financial resources. Maybe Hunter Water could make use of a system to capture the storm water run off and purify the water for drinking. This would alleviate our flooding and give Hunter Water free water.
