Submission: I work 13 km from my work and it costs me \$9.60 per day to get to work on the bus. It does not cost me that much to drive and parking fees as an employee at a public hospital. I therefore do not catch the bus as it is not financially beneficial for me. I have to keep my parking so i can travel safely on shift work. I do not understand why it costs the same for me to travel 13 km from Stanhope gardens to westmead as it does to travel 40km to the city. If you truly want to ease road congestion, then reconsideration of your guidelines of travel distances and fares would be appreciated.
