Submission: I live on Dangar Island which is serviced by the Brooklyn Ferry, and am dependent on the Brooklyn Ferry in order to be able to leave the island, as are many islanders. I have come across this enquiry today by chance as there has been no notification to islanders or ferry passengers about the enquiry, which will have a significant impact on transport costs for the next 4 years. The consultation is now half way through the 6 weeks without any of the Brooklyn Ferry passengers having been told that this is even on. I request that notification be provided to passengers, and that the 6 week consultation period then be restarted. The current situation results in the appearance of consultation while in fact the affected parties are unaware that consultation is being undertaken. Having rung iPart to express my concern I am told that iPart do not record or respond to phone calls and that I will need to put a submission in.
