Submission: My submission in regards to rates & the pensioner rebate of \$250.00, is instead of thinking of deferral of this money it should be increased & kept as the same principle as now. My reasoning for increasing the rebate is the proportion of the rates we pay now the \$250.00 is a mere drop in the ocean compared to the charges our local council charge now, we have had a increase "passed by the government" that will increase our rates by 45% over 4-5 years compounding. I do not understand how you think people can keep paying these increases. Yes I know some people retire on big money but the majority do not!!!
