Submission: Water rates are very high in my area of the old WSC, I'm for anything that brings them down, Im quite miffed about why we pay such high rates yet have no kerb and guttering, and im told by Council, "I'll be lucky to see them in my lifetime, so instead we have top soil being washed into the Beautiful Lakes, I've watched both Water and Land Rates (the later not in your care atm) in 15years but haven't really seen a step up in services, other than a couple small pipelines and pumping stations in 3 local creeks, Yet we are again on the verge of water restrictions, What have they spent the sum they make?
.... Much appreciated and thanks for reading.. [REDACTED].
