Submission: This is a most unacceptable scheme. Based on the amount of water in this submission. The infrastructure is not in place to manage such volume. It is high risk for contamination, with childrens surf carnivals being conducted regularly. It's centralised position poses health and safety risks to all that come in contact with that area of the beach. There is no way that residents feel safe that this effluent will be treated correctly or consistently and there is no guarantee it will not pose serious environmental and health risks for the future
