Submission: This email is in relation to the following Draft Report: - Review of Central Coast Councils water sewerage and stormwater prices - April 2019. Section 11.3, page 120 of this report is for Solo water.

I feel that the water supply from the utility to Solo should be at wholesale prices instead of retail prices. Can you please differentiate between wholesale and retail water prices (i.e. what minimum number of users or volume of water consumption qualifies as wholesale)?
