Subject: Variation to Catherine Hill Bay waste water plan

To whom it may concern,

I object to the proposed variation. The idea that in this day and age that anyone would revert to some pre-19th century solution to an environmental and health issue defies explanation. I can only image the protests from the considerably large surfing community from the Central Coast and Newcastle area over this mismanaged idea. The environmental constraints and sensitivities and close proximity to a State Park were well known prior to the development being approved. This variation should be rejected and a 21st century solution be formulated.
