

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

4:07:39 PM

The Feed-in Tariff should properly reflect the value of the electricity supplied. It is abundantly clear that the current rate does no such thing, and then to further neglect the consumer, when an outage, planned or not, occurs, our solar generation is also shut down. Currently the system is designed and operated to suit and maintain the status quo.
