Subject: SUBMISSION CATHERINE HILL BAY WATER

This creek had finally recovered after years of mine coal wash only to be threatened by an estate compared to blue haven by the sea , an over development that from the ocean has trashed the Moonee beach outlook, Johnny Stewart would roll in his grave as one of the only original dwellings on the pristine headland long gone only to be replaced by 2 story mansions with enough yard for a clothes line and a sewer system that was designed to put treated sewer onto lawns that now can't cope, what idiot calculated that blunder . So now solo water wish to gain permission to pump the excess 162 000 litres a day into south end catho creek, As Hinch would say SHAME .

How is it that Belmont south beach sewer pipe in the 90s was proven to pollute the beach and the pipe was extended 100s of meters out to sea, Redhead and blacksmiths beach surf clubs are klms away yet its somehow ok to pump into a natural beach creek mtrs from a surf club , and why is lake Macquarie council even considering this ridiculous idea when national parks said no to pumping into Moonee creek. I am totally against this proposal , Anyone who knows the beach will understand the impact, a surf club with swimming flags less than 100m away , a creek lagoon that only breaks through to the ocean on heavy rainfall or huge surf, a break that forms from the flow from the creek that peels a perfect left and right bank that kids to oldies enjoy ridding, kids play in the sandy lagoon , solo water grow up.
