SOLAR FEED-IN TARIFFS 2017/18

Saturday, 13 May 2017
10:30:18 PM

The feed in tariff needs to be related to the wholesale price of electricity and follow any price changes. When we purchased our system we calculated our general usage and bought a system which would just about cover our usage. We now find that the price we get for our feed in is so low we are charged over \$200 per quarter! We are pensioners and thought we would be almost breaking even but not so. The price we get should be substantially higher and a minimum set to keep the providers honest.
