SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:57:26 AM

- * I support a fair price for solar;
- * The feed-in tariff should increase in line with the wholesale price of electricity
- * The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum
- * The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
- * it is totally unjust that I produce excess electricity to my needs and sell it to energy Australia for 5 cents/kWh and then have to buy it back at 25cents at night.
