

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:09:40 PM

We urge the NSW government to adopt the IPART recommendations to increase the solar feed in tariff.

We were early adopters of solar power primarily for environmental reasons. For us the growing contribution of solar production to the grid is of primary importance.

For this reason a regulated minimum tariff is of crucial importance;it encourages more people to adopt solar production.

We believe the Government must regulate the tariff to ensure that retailers offer it at a fair price. To leave it to the market in the hope that competition would achieve a better result is naive in the extreme.
