SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:20:25 PM

I support a fair price for solar. It's not just that the electricity I produce is of less value compared to the wholesale price of electricity. Solar benefits the environment, health of humanity & my hip pocket. I have invested in the solar system, why should energy companies take advantage of this? Solar & other renewables are the future & must be encouraged.
