SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
12:49:39 PM

I do believe that energy is in a crisis and that all the help needs to be garnished from all those people who have solar. A reasonable amount of feed-in remuneration needs to be given to persons who took a risk and invested their own money to purchase solar. I myself spent more than \$40,000 on solar, most of which is fed into the grid and Energy Australia are the recipients who may charge that same electricity out at very high prices.
