Submission: The local community / local surfers / local beach goers do not want this proposal going ahead at all. Catherine Hill Bay has already had enough land and habitat destruction in the last 5 years that it will not receive any more. This proposal will have devastating consequences on the local environment and damage the local water ways and the local beaches. There are a number of people that will not use our beach anymore if this proposal goes ahead and there are even more people willing to fight for the protection of our beautiful little ecosystem about to be harmed once again by a large company with no idea on the environmental effects this will have and opting for the cheapest way out, this needs to be stopped, Now.
