**SOLAR FEED-IN TARIFFS 2017/18**

**Thursday, 11 May 2017**  
3:37:50 PM

Dear Sir/Madam,

I support a fair price for solar feed in at the rate of approximately 15 to 18 cents per kWh.

This price must regulated as to make it discretionary, would defeat the purpose of fair pricing for a company focused on profits only not the maintenance of affordable power.

Now the system has been taken out of the public ownership, the regulatory constraints should force the businesses to live up to their social obligations and act in the interest of the public, not their self interest.

Yours Sincerely

Barry Sutcliffe
