

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Monday, 22 May 2017

4:38:25 PM

I believe the feed in tariff should be set at a fair rate closer to the usage tariff.

In fact some sort of gross feed in tariff should be revived, albeit lower than the 60 c rate. The instant net feed in is unfair, as it has too short a time period for reconciliation that covers discretionary use of power during peak/shoulder times.
