**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

2:35:47 PM

we need a fair price for solar if we have any hope of meeting Paris targets and do anything meaningful about climate change;

The feed-in tariff should increase in line with the wholesale price of electricity-- that's just fair;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; my support for solar remains but to expand the number of rooftops and other systems the price has to be fair and attractive.
