**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

12:40:51 PM

I support an increase in the solar feed-in tariff as the more people who are able to incorporate solar into their electricity use the better. We need to transition from fossil fuels to renewables as soon as possible if we are to combat the devastating effects of climate change. Making solar more accessible to everyday Australians is the best way to do this.
