

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
10:40:45 AM

I believe that a more fair price for solar is appropriate and that the feed-in tariff be increased in line with the price of electricity. In this way the tariff better represents the true value of solar and recognises the environmental and health benefits. I submit that feed-in tariff should be regulated so that it is offered as a minimum not a benchmark.
