SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

9:45:19 PM

I support a fair price for solar because I have solar panels and think it grossly unfair that we only get 8cents for the power we make for the grid. Especially in view of the choice we have made to invest in solar because of the benefits to the environment and the planet.

I think all solar owners deserve that the feed-in-tariff reflects the true value of the investment they have made to solar energy.

Thanks and regards

Christopher and Gabriele
