SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

4:31:37 PM

I strongly support a fair price for solar. We are providing an environmentally friendly means of generating electricity and should be repaid fairly for this. The fact that the same kw hour we produce and supply back into the grid that we then get charged up to 5 times the amount for is an absolute joke. Bring the buyback price in line with the supply price to reward people for supplying a means of environmentally friendly and sustainable electricity resources.
